

JLab Instruments

Product Code . JA-BTD-3336 Little Giant

Description

Little Giant

Optimum Size

Unique Tip-Cone

Fully Autoclavable

Li'lpet is held like a pipette and not like a syringe

little giant is fully autoclavable at 1210C, 15 psi for 10-15 mins.

This is a unique feature that makes lilpet a genuine miniature micropipette.

This also allows the lilpet to be used for reverse pipetting and repetitive pipetting.

Li'lpet is 130 mm in length which is an optimum size for user comfort during pipetting.

Use of ultra micro tips for volume up to 20 µl enhances the accuracy and precision very significantly.

The tip cone of li'lpet (5 μ l, 10 μ l, 20 μ l) is designed to accept both regular 200 μ l tips or ultra micro tips up to 20 μ l.
